### GAZETTE RETURNS THANKS

The GAZETTE is very grateful to its many friends for the interest they are taking in the new daily, especially in the matter of sending in so many news items. This assistance is truly appreciated and sincere thanks are returned for these many favors. It is hoped that such kindness will be continued, it being the desire of the paper to make it as bright and readable as possible and to print the largest measure of the daily doings in Corvallis.

### SAVING THE NEXT GENERATION

Defective eyesight is even more common than defective hearing and usually more disastrous in results. A Chicago physician states that the number of "short-sighted" children in the country today runs away up into the millions. And this great army of little weaklings may be made healthy, robust children by the timely and proper fitting of glasses! Besides defective eyes and ears there are many other nervous irritants which either escape the parents' eyes altogether—which is almost always the case—or else

they are voted too trivial to need correction. The skilled physician can find them; he knows, too, that while there are quicker ways deliberately to wreck a child's health, there is no surer and more deadly course than the neglect of these "trivial" abnormalities.

A crooked tooth sounds unimportant enough, but in a young child it may completely disarrange its bodily, mental and moral development. Proper mastication is prevented and impaired digestion with all its promise of permanent weakness naturally follows:

The case is cited of a little girl who had grown to be a hopeless "liar." She was anemic, very delicate and frequently ill. A careful examination revealed constant fermentation in her stomach, and this was caused by a single crooked tooth which prevented the grinding motion so necessary to proper mastication.

The fermentation of food in the stomach caused unnatural nervous reflexes, which in turn overstimulated the brain and resulted in a disordered imagination. The child "day dreamed" and exaggerated. The straightening of the tooth made her normal in every way.

In the medical inspection of the New York City schools, it was found that 30 per cent were backward. Putting the matter in the light of economy, the city was wasting \$3,000,000 a year in teaching children who were physically unfit to receive an education. Examination revealed the fact that of the small army of backward children over 95 per cent were "dull" because of physical defects. And of this considerable, almost total, number more than 95 per cent were changed from dullards into normally bright scholars by simple operation or physical treatment.

### NEW TELEPHONE DIRECTORY

Subscribers Should Call by Numbers to Get Prompt Service

Call by numbers. The Independent Telephone Company has a new directory out and the same is now being distributed. The directory contains a list of all of the towns in Oregon, Washington and British Columbia which may be reached over the Independent Telephone line, and this list is supplemented by a map of the Northwest coast with the line marked thereon.

The directory proper is a complete list of all the subscribers of the Independent Telephone Company in Benton and Linn counties alphabetically arranged, and in addition there is a business directory classified according to the different businesses.

Among other places showing a considerable list of users of the Independent Telephone Company besides Corvallis and Albany is Alsea, Bellfountain, Lebanon, Brownsville, Crawfordville, Plainview, Sweet Home, Scio, Tangent and Peoria.

Since the directory was issued several new names have been added and these are on a supplemental list which occurs in the front part of the directory.

It is the intention of the company to furnish their subscribers each month with a supplemental list showing new telephones that have been added, and also changes that have been made since the last directory was issued. In this way the subscriber's directory will be kept up to date. The company especially requests that their patrons call by numbers instead of by names. This is not so much on account of the convenience of the subscriber and his more prompt and efficient service. When parties are called by names, it is frequently necessary for the operator to consult her directory requiring a certain amount of time and thus delaying the call. If subscribers will use the numbers, this will be avoided and the operator can get parties much more quickly.

The directory also contains an invitation to all patrons to visit the office any day from two to five o'clock in the afternoon to witness the operation of the new and up to date exchange which is complete with all modern appointments.
